HTML WEEKEND ASSIGNMENT

<u>Make sure you read and understand each task before attempting to answer</u>.

1. Create a page with a link at the top of it that when clicked will jump all the way to the bottom of the page. At the bottom of the page there should be a link to jump back to the top of the page.

2. Print the squares of the numbers 1 - 20. Each number should be on a separate line, next to it the number 2 superscripted, an equal sign and the result. (Example: $10^2 = 100$).

3. Prints an h1 level heading followed by a horizontal line whose width is 100%. Below the horizontal line print a paragraph relating to the text in the heading

4. Print a long quote and a short quote. Cite the author of each quote.

5. Create some links to various search engines (google, yahoo, altavista, lycos, etc).

Note: This assignment should be done as single website where all answers to each question is a page in the website and linked together just like a functioning site . Utilize Css to give each page a good look.
